## EDUCATION

J.C. Bose University of Science and Technology, YMCA

Oct 2022 – June 2026

*Bachelor of Technology in Computer Science and Engineering*

*Haryana, India*

## SUMMARY

Full Stack Developer skilled in JavaScript, Java, and modern frameworks like React, Next.js, and Three.js. Proven ability to deliver responsive, user-centric web applications using scalable architectures. Built and deployed multiple real-world projects, integrating AI, authentication, and dynamic UIs. Quick learner and collaborative team player.

## EXPERIENCE

The Developers Arena

Oct 2025 – Present

*Software developer intern*

*Remote*

- Developed scalable applications using React, implementing advanced component patterns, state management (Redux/Context API), routing, and performance optimization.
- Built and maintained backend services with Node.js/Express, including authentication, REST API development, real-time communication, and database integration.
- Delivered complete full-stack features, performed cloud deployment, improved system performance, and followed best practices in security, testing, and clean architecture.

## PROJECTS

Resumind 🔗 | Next.js, Typescript, TailwindCss

- Developed a modern, responsive resume management platform with secure upload, storage, and cross-device support..
- Integrated browser-based authentication using Puter.js, eliminating backend dependencies for seamless access..
- Implemented AI-powered resume matching with ATS scoring and personalized job fit feedback..
- [GitHub Link](#)

Admin Dashboard 🔗 | React, TailwindCss, Javascript

- Developed a centralized, user-friendly interface enabling real-time access to critical data across modules..
- Implemented interactive data visualizations and dynamic charts to enhance insights and usability..
- Built a modular multi-page layout (Dashboard, Reports, Settings) for improved navigation and user experience..
- Designed a unified dashboard view to consolidate key information for efficient decision-making..
- [GitHub Link](#)

Prescripto 🔗 | React, TailwindCss, Javascript

- Built a responsive doctor appointment booking platform with a clean, user-friendly interface..
- Implemented a 7-day rolling window for users to schedule appointments based on real-time availability..
- Enabled real-time filtering by doctor specialty (e.g., cardiology, dermatology) for faster user navigation..
- Integrated time slot selection with validation to ensure conflict-free appointment booking..
